Call for Papers

**Springer - Palgrave Mac Millan Sustainable Finance Series
for academics, scientists and practitioners alike**

Title: *Climate Finance for Climate Action*

Dear colleagues, researchers, startups and business associates,

The specialist book series Sustainable Finance has become an integral part of specialist literature. It now comprises 17 volumes and, with almost 3,540,000 downloads, is one of the most successful series published by **Springer - Palgrave Mac Millan**.

In Partnership with the **Verbier Summit-the global sustainability & finance forum in the Alps**, let's co-create the future and integrate a yearly anthology of the world's best Sustainable Finance papers. We invite your contribution based on your thought leadership and expert knowledge.

We herewith invite you to contribute to the following topics:

1. **Carbon and GHG Reduction Finance:** Exploring financial mechanisms and instruments related to carbon emissions reduction and carbon trading markets.
2. **De-risking Climate Challenges:** Analyzing investment strategies and opportunities aimed at addressing climate change challenges, such as renewable energy projects and sustainable infrastructure development.
3. **Climate Financing:** Examining various financing mechanisms and sources of funding for climate-related projects and initiatives, including public and private sector investments.
4. **International Climate Finance:** Discussing international frameworks and initiatives for climate finance, including agreements such as the Paris Agreement and mechanisms like the Green Climate Fund.

5. **Green Finance:** Investigating financial practices and instruments that promote environmental sustainability, such as green bonds, sustainable investment funds, and eco-friendly lending practices.
6. **Green Financial System:** Assessing the role of financial institutions and markets in transitioning towards a more sustainable and climate-resilient economy.
7. **Modelling Climate Risks:** Developing models and methodologies to assess and manage financial risks associated with climate change, including physical, transition, and liability risks.
8. **Policy Issues of Climate Finance:** Examining policy challenges and opportunities in the design and implementation of climate finance policies at the national and international levels.
9. **Sustainable Finance:** Exploring financial strategies and frameworks that integrate environmental, social, and governance (ESG) factors into investment decision-making processes.

The timeline is as follows:

- **Submissions** – September 16, 2024, submit Information to the editors that you will contribute. Please use the excel sheet attached or on website when expressing your commitment to contribute.
